Full Stack Developer

Full Stack Web developer with a passion for creating great products. My experience in many different work environments has taught me to adapt quickly to new technologies and tasks. As a strong IT professional, I'm excited to apply my insights with a team of other great engineers and to grow within a dynamic company.

SKILLS

LANGUAGES: JavaScript, SQL, PHP, Python, HTML, CSS

TECHNOLOGIES: MERN, LAMP, Node.js, MongoDB, Linux/Unix, React.js, Express.js, Postgres, Django, Laravel, Bootstrap, JQuery, Oauth, JWT, Github, Heroku, Insomnia, Passport, Morgan, bcrypt, Microsoft Office Suite, Wordpress, Squarespace

PROJECTS

Game of Pure Strategy
- Card game built out of bootstrap templates to be played locally
- Used Javascript and jQuery to create dynamically loading pages that presented an updated score
- Applied Git throughout the process for version control and tested features

Beer Finder
- Used HTML5/CSS3/Bootstrap to create views of Beer Recipe app
- Implemented authentication with sign up / log in / log out functions using Passport.js and OAuth
- Built the app with full CRUD functionality using Javascript on Node.js and frameworks; data stored using MongoDB database through Mongoose
- Used Heroku to deploy and MongoDB atlas to manage database

https://colescarbide.com/
- Laravel site developed with PHP to showcase product and provide information on company
- Worked with thrive digital agency to implement SEO strategy
- Hosted with digital Ocean generating 500+ clicks per month over the last 2 years
